Solution Summary

- Problem: one backend is needed for authentication, blog operations, and AI writing tasks.
- Solution: Node.js/Express REST API with MongoDB/Mongoose, JWT, and Gemini.
- Core scope: register/login/profile, blog CRUD, AI generation, summarization, and categories.
- Intended impact: reduce repetitive content preparation; impact is not measured.
- Business model: none defined; project is presented as an academic implementation.
- Scalability: modular foundation; capacity and deployment are not measured.

Scope Boundary

No hosted frontend, production deployment, or load-tested capacity is claimed.
