

Solution Architecture

Backend components and request flow

Project	AI-BlogNest API	Team ID	6ab6286e14835f68f938d881
Leader	S. Rushyan	Date	27-09-2026
Members	K. Anandhan, M. Neelakandan, M. Sanjay, D. Jeevan Kumar	Dept	Computer Science

Architecture Flow

- API client -> Express REST API -> JWT middleware for protected routes.
- Express controllers/services use Mongoose to access MongoDB.
- AI requests pass from the service to Google Gemini and return to the API client.

Component Responsibilities

- API client sends requests and reads JSON responses.
- Express routes requests to controllers and services.
- JWT middleware checks protected requests.
- Mongoose models represent user/blog data; MongoDB persists data.
- Gemini service requests generated blogs or summaries.

Operations

Supplied test screenshots use <http://localhost:5000>. Production topology is not documented.
