

Performance Testing

Observed request times from supplied API examples

Project	AI-BlogNest API	Team ID	6ab6286e14835f68f938d881
Leader	S. Rushyan	Date	27-09-2026
Members	K. Anandhan, M. Neelakandan, M. Sanjay, D. Jeevan Kumar	Dept	Computer Science

Test Scope

These are individual timings shown in screenshots, not a formal load, stress, or endurance test.

Observed Samples

- Registration: 464 ms, HTTP 201 Created.
- Login: 243 ms, HTTP 200 OK.
- Create blog: 136 ms, HTTP 201 Created.
- List blogs: 153 ms, HTTP 200 OK.
- AI generation: 10.47 s, HTTP 201 Created.
- AI summary: 4.95 s, HTTP 200 OK.

Interpretation

Gemini-backed examples took longer than local authentication/blog samples. Provider, network, content size, and load affect results.

Repeatable Test Recommendations

- Record runtime, database location, payload size, and AI model.
- Repeat requests and report median and 95th-percentile latency.
- Use controlled concurrent load before drawing capacity conclusions.
- Do not expose passwords, tokens, or API keys.
