

Project Executable Files and Runtime

Source-run API package and launch context

Project	AI-BlogNest API	Team ID	6ab6286e14835f68f938d881
Leader	S. Rushyan	Date	27-09-2026
Members	K. Anandhan, M. Neelakandan, M. Sanjay, D. Jeevan Kumar	Dept	Computer Science

Project Type

AI-BlogNest API is a Node.js backend service. Screenshots show source files, package files, and local environment configuration.

Runtime Elements

- server.js - server startup file shown in project view.
- app.js - Express application setup file shown.
- package.json and lockfile - Node.js package metadata visible.
- .env - local environment configuration; never publish secret values.
- src contains config, controllers, middleware, models, routes, services.

Local Run Context

Terminal evidence shows nodemon starting node src/server.js and the server listening on port 5000. No compiled Windows executable was supplied; this runs as a Node.js service.

Secret Handling

Keep secrets out of public repositories; use an example environment file with variable names only.
