Current Position and Future Work

- Architecture: modular Express structure shown; keep domain modules and contracts clear.
- Database: MongoDB/Mongoose; evaluate indexes, pagination, and backup procedures as needs grow.
- AI: Gemini endpoints demonstrated; consider timeouts, retries, usage limits, and logging.
- Security: JWT is in scope; review expiry, password handling, validation, and rate limiting in source.
- Performance: only individual response times shown; run repeatable load tests.
- Deployment: local port 5000 shown; select a host and add monitoring before release.
