

Brainstorming and Idea Prioritization

Project ideation summary

Project	AI-BlogNest API	Team ID	6ab6286e14835f68f938d881
Leader	S. Rushyan	Date	27-09-2026
Members	K. Anandhan, M. Neelakandan, M. Sanjay, D. Jeevan Kumar	Dept	Computer Science

Project Challenge

Provide one backend API for user authentication, blog management, and AI-assisted content tasks. This is a synthesized project ideation summary, not a record of a formal workshop.

Candidate Ideas

- Authentication and protected profile access - high priority.
- Blog create/read/update/delete - high priority core workflow.
- Google Gemini blog generation and summarization - medium priority AI features.
- Categories for organizing blog posts - medium priority.

Selected Direction

Use Node.js/Express, MongoDB/Mongoose, JWT, and Google Gemini in a modular REST API.

Priority Rationale

- Authentication secures the workflow.
- Blog operations deliver the main content capability.
- AI endpoints extend content creation and review.
