Research Basis

These statements are design assumptions for intended users; no interviews or surveys were supplied.

Problem Statements

- Blog creator: needs to create and manage posts through an API; BlogNest provides authenticated blog operations.
- Writer: wants help drafting or condensing content; BlogNest provides Gemini-backed generation and summary routes.
- API integrator: needs predictable responses; BlogNest exposes REST routes and JSON responses.

Combined Statement

BlogNest users need a secure, consistent API to manage blog content and perform AI-assisted writing tasks so these capabilities can be integrated into one backend workflow.
